

Radon Test Instructions: Quick Start Guide

(see more detailed instructions on reverse)

Thanks for joining the 100 Test Kit Challenge!

1. Open the foil test kit package and **RECORD THE DATE** on the paper envelope. **ONCE THE FOIL PACKAGE IS OPEN, THE DETECTOR IS ACTIVE.** Keep the envelope **ON YOUR FRIDGE** until you have received your test results from the lab. *(Dispose of the used foil package and keep the new foil package in the envelope to return your detector after testing is complete).*
2. **PICK** a room and a location in your home and **PLACE** your detector.
3. Log on to www.radontestkitchallenge.ca and complete the **START SURVEY**.
4. Leave the detector in place for the next 100 days to complete measurement.

On the date you are ready to drop the detector off at the Community Collection location:

5. Complete the online **END** survey and **RECORD** the date on the paper test kit envelope.
6. Place detector into the **new** foil package and **RETURN** the detector to the Community Collection Point location listed on your envelope. Keep the paper envelope for your records.

1. **OPEN** the foil package and remove the detector.

2. **PICK** a room and **PLACE** the detector beside a bed or couch in the lowest “lived-in” level of your home.

3. Go to radontestkitchallenge.ca and complete the **START SURVEY**.

4. Leave in place 100 days (*min.91 days*).

5. Log on and complete the **END SURVEY**.

6. **RETURN** the detector in the new foil package to your Community Collection Point listed on your envelope.

Setting up and activating your detector

1. OPEN the foil test kit package. Your test is now active and ready to use. Please complete the information on the paper envelope and store the envelope on your fridge or in another convenient location until you receive your radon test results from the lab at the end of the program.
2. PICK a room: The radon test should be placed in a room such as a basement bedroom, office or play room, if none in the basement then choose one on the main floor where you spend an average of at least 4 hours per day. Radon levels are generally highest in lower levels of your home.

PLACE the detector in a proper location in that room. Place your detector beside a bed or couch, or on a shelf. Ensure it is away from windows, fans and air openings, and off of the floor.

Good locations include: *Basement bedrooms, family rooms or offices; ground-level family rooms, living rooms, dens, playrooms and bedrooms. A bedroom is preferred because people generally spend more time in their bedrooms than in any other room in the house.*

DO NOT place the detector in crawl spaces, kitchens, bathrooms, laundry areas, furnace rooms, or closets.

After you have set up your detector:

3. COMPLETE the START Survey online. Enter your contact information and start date and complete the launch survey online at: www.radontestkitchallenge.ca

Enjoy the next 100 days. If you have provided us with your email address in the Start Survey, we will send you a reminder email about the upcoming collection period.

At the end of the testing period (after 100 days):

- COMPLETE the END Survey. Log in to www.radontestkitchallenge.ca to register the end date of the measurement period and complete the last few questions of our survey.
- Place your detector in the new foil package and **drop the detector off at your** Community collection point. The address and the hours of operation are specified on your envelope.
- If your detector is not returned during the drop off period, **you will be responsible for the cost of mailing it to the lab for analysis. The lab address is: SRC, 143-111 Research Drive, Saskatoon, SK, S7N 3R2**

Detector Placement: Minimum
