

TAKE ACTION ON RADON

NORTH GRENVILLE, ON

100 Radon Test Kit Challenge

Radon is a naturally occurring radioactive gas that comes from the ground.

90 HOMES

of the 6658 homes in North Grenville participated by testing for radon gas during the winter of 2019.

22 of the 90 homes tested above Health Canada's guideline of 200 Bq/m³.

Exposure to elevated levels of radon is linked to increased chances of developing lung cancer.

UNDER 100 Bq/m³
(49%)

100-200 Bq/m³
(27%)

OVER 200 Bq/m³
(24%)

Levels can vary between neighbouring houses. The only way to know your radon level is to test.

Radon enters a home through contact with the ground and can build up to elevated levels.

HOW TO FIND A CERTIFIED PROFESSIONAL

TakeActionOnRadon.ca/test/

find-a-radon-mitigation-professional/

Certified radon mitigation professionals are trained to properly assess your home, and design systems to efficiently and effectively reduce your radon level.

The Ontario Building Code requires each municipality to determine if radon 'constitutes a hazard to their residents' in order to determine if there should be requirements for radon control measures in new construction. The Canadian General Standards Board standard CAN/CGSB-149.11-2019 provides technical recommendations for radon control measures in new low-rise residential construction.

Radon gas levels are reduced the most by installing a **radon mitigation system**. Research shows that **certified radon professionals** can reduce levels by over 90%. Other steps, such as increasing ventilation and sealing cracks, can help in the short-term but are less effective.

For more information, go to:

www.canada.ca/en/health-canada/services/publications/health-risks-safety/residential-radon-mitigation-actions-follow-up-study.html

radon mitigation system

A **radon mitigation system** is installed with a fan that draws air (and radon) up from beneath the foundation and discharges the radon to the outdoors. This system reduces radon levels by preventing radon from entering your home.

Tarion Warranty provides coverage for radon mitigation within the first seven years after a home is built.
