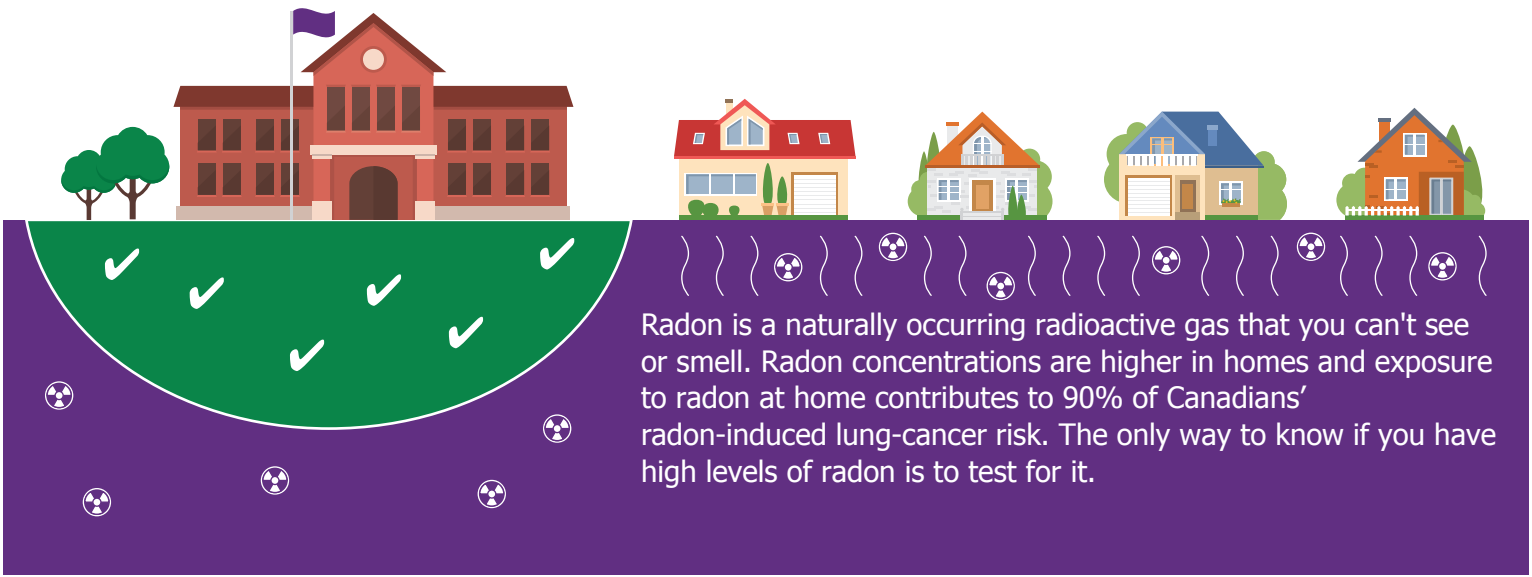
# Your school is testing for radon. Now it's time to test your home.

[insert school/board name] is working on a plan to test [insert # or delete] schools across the province for radon gas.



Radon is a naturally occurring radioactive gas that you can't see or smell. Radon concentrations are higher in homes and exposure to radon at home contributes to 90% of Canadians' radon-induced lung-cancer risk. The only way to know if you have high levels of radon is to test for it.

**Purchase a long-term radon test kit at: takeactiononradon.ca**
