

TAKE ACTION ON RADON

KELOWNA, BC

100 Radon Test Kit Challenge

Photo Credit: Harry Johnson

627 HOMES

participated by testing for radon gas during the winters of 2020 and 2021. This represents approximately 1% of the community dwellings.

22% of homes tested above Health Canada's guideline of 200 Bq/m³.

 represents 10 homes tested.

Radon is a naturally occurring radioactive gas that comes from the ground.

Exposure to elevated levels of radon is linked to increased chances of developing lung cancer.

Levels can vary between neighbouring houses. The only way to know your radon level is to test.

Radon enters a home through contact with the ground and can build up to elevated levels.

HOW TO FIND A CERTIFIED PROFESSIONAL

Go to: www.TakeActionOnRadon.ca/test/find-a-radon-mitigation-professional/

Certified radon mitigation professionals are trained to properly assess your home, and design systems to efficiently and effectively reduce your radon level.

The BC Building Code requirements for radon vary by year and region. Some homes have a radon stub pipe or an extended pipe that runs through the house. These features are the beginning of a radon mitigation system and can

Radon gas levels are reduced the most by installing a **radon mitigation system**. Research shows that **certified radon professionals** can reduce levels by over 90%. Other steps, such as increasing ventilation and sealing cracks, can help in the short-term but are less effective.

For more information, go to: <https://www.canada.ca/en/health-canada/services/publications/health-risks-safety/residential-radon-mitigation-actions-follow-up-study.html>

radon mitigation system

A **radon mitigation system** is installed with a fan that draws air (and radon) up from beneath the foundation and discharges the radon to the outdoors. This system reduces radon levels by preventing radon from entering your home.

This report shows data from two years of testing. The data is broken down as following:

	2021-2022	2020-2021	TOTAL
	# of tests	# of tests	
Kelowna	54	573	627

Missed your chance to test?

Check out Take Action on Radon's website for more information on how to access a long-term (91-day) test kit in your region and how to properly test your home.

This project was supported by the BC Lung Foundation and a partial funding provided by the Vancouver Foundation and British Columbia Real Estate Foundation.

Take Action on Radon is a national initiative funded by Health Canada with a mandate to bring together stakeholders and raise awareness on radon across Canada. The current advisory team is made up of the Canadian Association of Radon Scientists and Technologists (CARST), CAREX Canada and the Canadian Cancer Society.
