

Radon Test Instructions: Quick Start Guide – For RESIDENTIAL

(for WORKPLACES See Instructions on reverse)

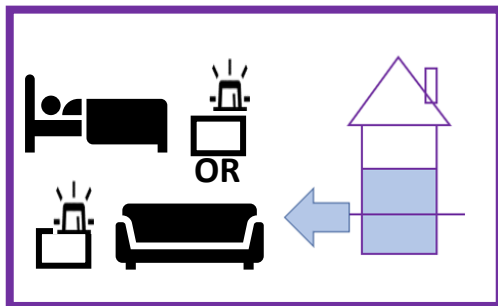

Thanks for joining the 100 Test Kit Challenge!

1. PICK a room and a location in your home to PLACE your detector. Choose a room in the lowest level of your home that is occupied for 4 hours per day or more (such as a basement or main floor office or bedroom) and place on a table, shelf or hang from the wall.
2. Open the test kit package and RECORD THE DATE on the test kit envelope.
3. ONCE THE PACKAGE IS OPEN, THE DETECTOR IS ACTIVE. Keep the envelope and the foil package ON YOUR FRIDGE until you have received your test results from the lab.
4. Log on to www.radontestkitchallenge.ca and complete the START SURVEY.
5. Leave the detector in place for at least 91 days to complete measurement.

On the date you are ready to drop the detector off at the Community Collection location:

6. Complete the online END survey and RECORD the date on the test kit envelope.
7. RETURN the detector to the one of the Community Collection Point locations listed on the website, keep the paper envelope for your records. Refer to link for times and locations to drop off kit: www.rdco.com/airquality → [Radon testing](#)

1. PICK a room to PLACE the detector beside a bed or couch in the lowest “lived-in” level of your home.

2. OPEN the package and remove radon detector.

3. Go to: radontestkitchallenge.ca and complete the START SURVEY.

4. Leave in place for at least 91 days.

5. Log on and complete the END SURVEY.

6. RETURN detector during the week of February 21-24, 2023
